

THE BEECHJET 400A is a superb example of traditional Beech leadership in quality, reliability, and support. It is clearly superior to its major competitor in speed, cabin comfort, and fuel efficiency.

Its supercritical type swept wing and powerful turbofan engines allow a fully loaded 400A to climb directly to 43,000 feet and to cruise at 449 knots with incredible fuel efficiency. As a productive business tool, the Beechjet 400A is unmatched in its class.
